

NLP TASK

TITLE: EXPLORING COCA- Corpus of Contemporary American English

NAME: APARAJITA SENAPATI

REG NO: 20BDS0288

Word: Barack Obama

Inference after exploring the corpora for the given word-Barack Obama

From the frequency chart we can observe that there were no or very few instances wherein Barack Obama was mentioned from the year 1990 till 2004, however there was a steep increase from then when he was in the run for becoming the president and was elected, there were mentions of his name in various domains like the news, web, talk shows, etc. We can also observe a slight decline in the frequency after his second term when a new president was elected. On using the collocate search the most frequent word is "President."

The screenshot shows the COCA search interface. The top navigation bar includes 'SEARCH', 'CHART', 'CONTEXT', and 'ACADEMIC (AVL)'. The search results are displayed in a table with columns for 'List', 'Chart', 'Word', 'Browse', 'Collocates', 'Compare', and 'KWIC'. The search term 'Barack Obama' is entered in the search box, and the results show a frequency of 23749. The interface also includes a 'Find matching strings' button and a 'Reset' button. A sidebar on the right provides additional information about the search results, including a 'LIST display' section and a 'More information' section.

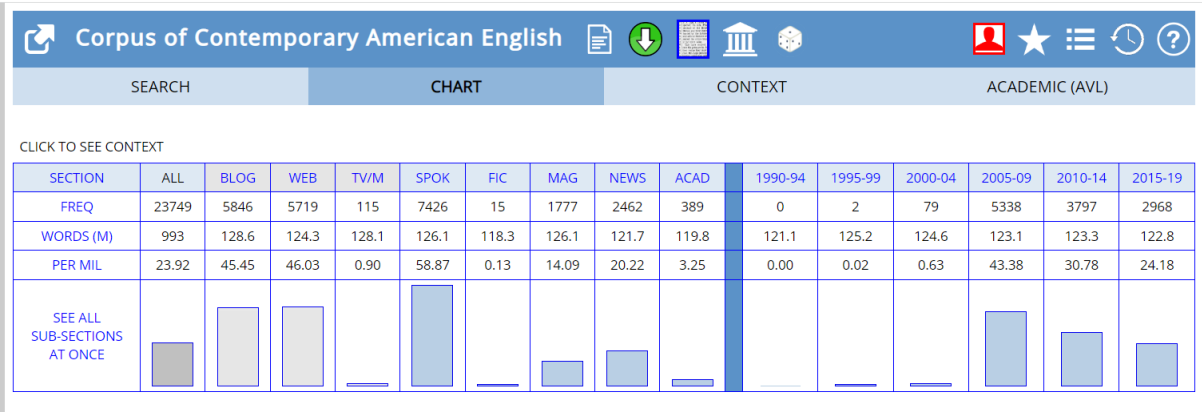

The frequency of the word Barack Obama is 23749

The screenshot shows the COCA frequency chart for the word 'Barack Obama'. The top navigation bar includes 'SEARCH', 'FREQUENCY', 'CONTEXT', and 'ACADEMIC (AVL)'. The frequency chart displays the frequency of the word across different domains (blogs, magazines, news) and over time (four-year intervals from 1990 to 2019).
